HEALTH CONNECT

"Your Health Data. Your Control"

THE PROBLEM

- Hospitals store records in isolated systems
- Patients rarely control their own data
- Doctors struggle to access patient history across clinics
- Researchers rely on incomplete datasets

RESULT: SLOWER CARE, POOR DATA SHARING, AND SECURITY RISKS

THE SOLUTION

A secure platform that allows:

- Doctors to request patient records securely
- Patients or guardians to approve or deny access
- AI to summarize medical history instantly
- All data transfers to happen over private secure networks

ARCHITECTURE

AUTH0

Secure identity for patients, doctors, and guardians

tailscale

TAILSCALE

Private network for secure data sharing between systems

ELEVENLABS

Voice assistant for accessibility and doctor briefings

VULTR

Cloud infrastructure storing encrypted medical data

BACKBOARD AI

Agentic AI system for medical summaries and insights
